After the registration, it stays in the way it is in the case of the above-mentioned index screen. When it is a frame screen, it automatically returns to the previous screen. By [return] at each index screen, it returns to the previous list screen, pressing [return] again, it goes to the story index.

After the registration, it stays the way it is in the case of the above-mentioned index screen. When it is a frame screen, it automatically returns to the previous Index screen. By `Ereturn` at each index screen, it returns to the previous list screen, and by pressing `Ereturn` again, it goes back to the story Index.
